

WELL BILT INDUSTRIES

"THE HANGAR DOOR PEOPLE"

SUBMITTED BY WELL BILT INDUSTRIES

Well Bilt Industries has been a leader in the aviation door and operator industry for the past 25 years. Well Bilt Industries sets the standard for which all other hangar door manufacturers

strive to match.

Mike Bilt, the company's founder and product developer, was a pilot for over 40 years. Channeling his mechanical and electrical background with his experience as a FBO owner in South Florida, he was able to combine his passion and knowl-

edge by manufacturing the quality of product he was in search for himself. After Bilt's sudden death in 2000, the company entered into its third decade of business headed up by his daughter, Carol Bilt.

Well Bilt Industries is dedicated to maintaining its superior quality of design,

engineering and safety features. Many of these features are exclusive in our industry, and for which we have been awarded

with U.S. patents. Also, Well Bilt Industries is the only bi-fold hangar door and operator manufacturer, to date, who has qualified and obtained UL-Listing. Both our U.S. patents and our UL-Listings solidify the high integrity of the product line as well as the company's reputation within the marketplace.

Carol Bilt

With a repeat customer base circling the globe, Well Bilt Industries still maintains the "Around-the-Corner" presence which offers our customers the ultimate

support system. We are always available and glad to assist should our help be needed.

Well Bilt Industries stands behind their products with pride and confidence.

Whether your project calls for a bi-fold door system, a rolling door system, or an operator, the entire staff at Well Bilt Industries is always available to assist you.

We look forward to having the opportunity to design and manufacture a custom door system best suited for your facility. Please do not hesitate to call our office and a Well Bilt Industries representative will be glad to answer all of your questions.

Well Bilt Industries...dedicated to excellence, generation to generation.
